# Small space, big design: Archeda's EASY bathroom system refines compact living

BY LUDOVICA IANNARELLI

**With the EASY collection, Archeda bathrooms' clean lines, warm materials, and soft hues define a new idea of comfort and harmony for contemporary living.**

In today's living landscape, where every square meter has become increasingly precious, design becomes an essential tool to turn spatial limitations into opportunities. The concept of *micro-living* has changed the design perspective: today it is no longer just about adapting furniture to small areas, but about rethinking proportions to bring intelligence, function, and beauty into everyday life.

The bathroom — once perceived as a purely technical environment — is evolving into an *experiential space*. Within this context, **EASY** by **Archeda Bathrooms** addresses the theme of compact living with harmony and consistency, proving that even a few square meters can become a fully expressed environment: elegant, functional, and pleasant to live in every day.

How can design intelligence be translated into a space as small as a bathroom? Archeda's answer is a project that simplifies not by subtraction but through clarity. EASY interprets space as a material to be shaped, combining functionality and style in a visually balanced composition.

Each configuration results from a precise synthesis between craftsmanship and contemporary taste. Base units with drawers and open compartments, mirrored cabinets, and tall storage columns create a fluid system where aesthetics and practicality coexist without compromising lightness. The philosophy is clear: *to simplify without trivializing*, offering solutions that enhance daily life and bring rhythm and harmony to compact interiors.

There is the Giada matt lacquer version with Quick 50 washbasin, Raggio mirror, and Arco lamp, where fresh tones meet formal simplicity; or the Poronocce Latte finish, paired with Cubo washbasins in Matt Tortora ceramic and Canapa handles, conveying warmth and natural balance. For those seeking a more distinctive mood, the Mattone matt lacquer and Rosa Quarzo composition with open compartment and Slim glossy ceramic washbasin expresses delicate modernity. The Poronocce Nazionale variant, with Titanio handle, Quick 45 Canapa washbasin with off-center drain, and Essenze column with push-pull opening, offers a more classic and reassuring atmosphere.

Across all versions, EASY speaks the language of visual harmony: every centimeter finds its place, every element contributes to a sense of order and serenity. Rather than imposing a style, it suggests a *grammar of everyday living*, where design becomes a discreet ally of comfort and well-being.

Material is the truest language of EASY. Lacquered surfaces, wood veneers, and ceramics — in glossy or matt finishes — create a tactile and visual balance that adds depth and comfort to the space. The color palette moves between the soft green of Giada, the powdery pink of Rosa Quarzo, the warm tones of Poronocce Latte and Poronocce Nazionale, and the refined neutrals of Tortora and Canapa.

These combinations are not meant for decoration but to enhance the perception of order and light. At the same time, *extreme minimalism gives way to a warm and sensorial minimalism*: soft textures, natural finishes, and gentle hues that convey calm and comfort. It's an evolution that reflects Archeda's philosophy: bringing harmony into everyday life through the quiet beauty of materials.

The beauty of EASY lies in its discreet way of inhabiting space. It does not seek to impress, but to express itself with the quiet confidence of a well-thought-out design — one that reveals its value over time. The Profilo mirrors, New lamps, and Strike accessories continue the same language of balance, completing the environment with coherence and lightness. Each piece maintains its own identity yet contributes to a shared rhythm of proportion and continuity.

With EASY, Archeda redefines the meaning of compact space: not as a limit, but as an opportunity to design better. Refined materials, calibrated geometries, and thoughtful use of light create a complete, orderly, and welcoming environment. The collection demonstrates that true design intelligence does not lie in multiplying solutions, but in giving value to what really matters: *balance, measure, functionality, and the quality of everyday living*. Because simplicity — when shaped with care — is the highest form of beauty.
